

SIGNRACER NEWS 01-2016

SIGNRACER Open House during Fespa Amsterdam

Between **8th** and **11th** of March 2016 SIGNRACER will present newest developments and printer-technologies in 4004 JP Tiel (Morsestraat 11a), Netherlands (*only 1 hour from FESPA Amsterdam*).

Highlights will be:

- **Signracer 2500 H-LED** hybrid high speed printing on banner and temperature sensitive material and new Amethyst SR-150 NVC (N-Vinyl Caprolactam) free inks for fast drying
- **Signracer 3116 LED** flatbed with new Amethyst SR-150 NVC (N-Vinyl Caprolactam) free inks for fast drying and Acetone resistance
- **Signracer 1600 H-LED** with a full glass production process including pre-treatment and a Bürkle liquid coating line for white coating after printing. Highest adhesion on glass will be achieved with Amethyst A50-UV-MPX inks
- **Signracer 0604 LED** flatbed with new 2.5 pl Ricoh Gen 5 head for finest print jobs on advertising materials. This is a development project with Ricoh

Please **register** by Email on info@signracer.ch

Rooms are organized at local Hotels in Tiel. Please inform us, if you need reservations.

All SIGNRACER models will be presented with the latest technological improvements:

- New totally quiet brushless vacuum pumps from Switzerland. Also the pumps improve the stability of the printer further due to less pulsation and have 1 year warranty
- A new capping function was added to allow for longer shut-off periods like holidays. The print heads are parked on a rubber plate to avoid any drying of the print heads
- New generation of the high performance LED system with 9.5 Watt/cm²
- SIGNRACER printers 2512, 2500, 3116 and 3200 SIGNRACER have the fibre reinforced cable chain, which guarantees a 24/7 operation and a proper protection of the cables inside the chain

Buonas, Switzerland, February 2016
